Introduction

For this scenario I chose Wines of Ontario, the marketing company for of the Ontario Wine Appellation Authority. The Wines of Ontario website is https://winecountryontario.ca/. The goal of their site is to encourage visits to wineries and to provide information about Ontario's unique wine appellations — distinct grape-growing regions that produce identifiable traits in wines. I selected five webpages, articles based on an appellation or region, so that I had a variety of pages with a similar structure and audience.

As preliminary work, I looked at the potential audience of the site, which would include both wine-experts and inexperienced readers with an interest in discovering local wine. The pages should use active language and should not cater only to the expert audience. The site, being focused on Ontario wines, should use Canadian English spelling and grammar. It should accommodate visitors from the United States by including Imperial units in brackets.

Client correspondence

Dear John Snow,

Thank you for requesting a quote for my services. I would be delighted to work with Wines of Ontario in editing the webpages requested. Here is a breakdown of my rates, based on the webpages and scope of editing you have requested. Please note that the times for the tasks are estimates used to calculate the quote.

Number of webpages	5	
Words per webpage	~500	
Estimated total word count	2500	
Images / graphics	Yes (low complexity)	
Level of editing:	Standard copyediting, plus proofreading.	
Quote breakdown		
Standard copyediting ($0.04 / word)	2 hours	$100.00
Proofreading ($0.03 / word)	1.5 hours	+ $75.00
Administrative tasks	1 hour	+ $50.00
Total		**$225.00**

(Rude, 2011; The Editorial Freelancers Association, 2026).

I will complete a detailed review of the five web articles provided. Each article is estimated at 500 words; articles submitted with more than 700 words will be subject to additional fees at $0.06 / word. A standard copyedit includes checking documents for: correctness of spelling, grammar, and punctuation; consistency of style; completeness and accuracy of content, including graphics and illustrations; some sentence-level revisions (Algonquin College, n.d.; Rude, 2011). Proofreading includes a final review of the document for: correct formatting; precise and correct punctuation; correct spelling and grammar (Cunningham, 2020).

Sincerely,

Nathan Hunt

Example contract

Document Details

Approximate total words: 2500

Number of visuals: 10

Editing tasks

- ☐ Spelling, punctuation, grammar.
- ☐ Consistency of style and content.
- ☐ Correctness, completeness, accuracy of visuals.
- ☐ Accuracy of terms, numbers, etc.
- ☐ Check cross-references & hyperlinks.
- ☐ Typesetting and page layout.

Delivery format: Microsoft Word (tracked changes)

Payment due

Editing fees	$212.50
HST @ 13%	$27.63
Total:	$240.13

Copyright notice: The client retails all copyright to the original and marked-up documents. The editor has the right to present the marked-up document as a portfolio piece on request. The marked-up document will not be made available publicly without the express permission of the client.

Conditions: Documents submitted for editing that exceed the agreed word count by more than 200 words will be subject to additional fees of $0.06 / word.

_____ _____

editor date client date

Contract adapted from page 357 of Technical Editing (Rude, 2011).

Editing plan

1. Review the five web articles selected by the client. Verify the approximate word counts and scope of work to be completed. Copy the webpage content into Microsoft Word.
2. First-pass review: Read through each article, confirm that all the content from the website was imported correctly. Note any obvious or major issues with the content. Make a note of any content (numbers, facts, and figures) that might require additional research.
3. Standard copyediting passes: (approximately 2 hours)
    a. Line level edit of spelling, punctuation, and grammar. Sentence-level revisions for clarity, conciseness, plain language.
    b. Review articles for instances of passive voice, inconsistent style.
    c. Check all facts and numbers, citing any sources of data for the client.
    d. Review all graphics for accuracy, formatting, style.
4. Proofreading passes: (approximately 1.5 hours)
    a. Close reading of punctuation for consistency and correct usage.
    b. Check spelling and usage of uncommon and commonly-misspelled words (Thurman, 2003).
    c. Test all hyperlinks and cross-references. Review formatting and layout.
5. Provide a summary letter describing the editing changes made by end of the next business day.

Webpages

Page 1: Prince Edward County (Wines of Ontario, 2025c)

Quaint Charm with World-Class Flavours

About 2 hours from Toronto on the north shore of Lake Ontario, this peninsula sits on a foundation of porous limestone that gives its grapes a distinctive minerality and bright acidity.

Climate

Most vineyards are ~~located~~ in areas that receive maximum benefit from lake breezes. Prevailing westerly breezes travel steadily across Lake Ontario and the Bay of Quinte, ~~to~~ helping moderate temperatures. ~~They~~ The lake effect is ~~are~~ especially beneficial during the warm summer months, keeping average temperatures around 22 °C (72 °F), with pleasant cooling during the hotter days and keeping cool nights at bay.

Commented [NH1]: Including conversions of all SI units to US customary units for consistency.

Topography

The County's topography is irregular, with hills creating various exposures for the vines, and valleys digging into the broad, flat Trenton limestone base. A gradual rise from northeast to southwest is crossed by ~~a number of~~ long, gentle east-west ridges and

Commented [NH2]: Specificity

occasionally steep, rugged escarpments. On the northern and eastern shorelines, rocky bluffs rise ~~to an elevation of~~ 30 m (98 ft) or more above Lake Ontario, while the western shore has many sandy inlets ~~with sandy shores~~ and large sandbars, defining ~~that define~~ bodies of water such as West Lake and East Lake.

Commented [NH3]: Use plain language

Soil

~~Topsoils~~ The topsoil ranges from reddish-brown clay loam to sandy loam, ~~and overlay~~ over limestone bedrock ~~embedded with shale fragments~~. The stony surface and ~~numerous rock and~~ shale fragments within the soil~~s~~ allows water to drain into the limestone; ~~, which ensures good drainage of~~ the winter-melt drains quickly and ~~substantial~~ the roots of ~~penetration for~~ mature vines grow deep. This rocky soil ~~also allows good heat conduction and retention~~ conducts and retains heat, encouraging ~~and encourages~~ early warming in the spring.

Commented [NH4]: Passive voice

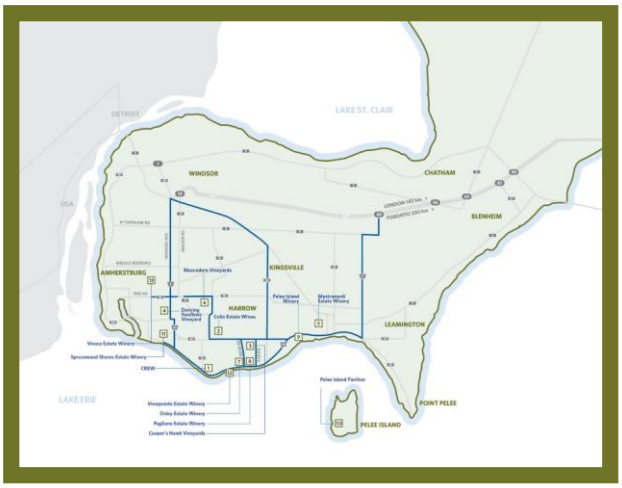
Commented [NH5]: Passive voice

Download the map for a look at all the wineries in Prince Edward County.

Page 2: Lake Erie North Shore (Wines of Ontario, 2025a)

Ontario's Southern Charm

Lake Erie North Shore is Ontario's southernmost appellation, ~~just~~ a few hours from the ~~GTA~~ Greater Toronto Area and Hamilton, and only minutes from Windsor and the U.S. border.



Climate

Lake Erie North Shore has a long growing season. It benefits from the quick summer warming of the shallow ~~waters of~~ Lake Erie, ~~as well~~ as ~~from~~ and an abundance of sunshine during the growing season. Early harvests are the norm, with picking ~~usually~~ beginning at the end of August and late-harvest varieties ~~often~~ reaching their peak by late October.

Commented [NH6]: Edited for conciseness

Topography

~~Bounded on the northwest side by~~With Lake Erie to the south, Lake St. Clair to the north, ~~to the west by~~ and the ~~fast~~ fast-flowing Detroit River to the west, ~~with Lake Erie to the south, and including the nine islands in Lake Erie, which make up the South Islands sub-appellation,~~ the Lake Erie North Shore appellation is almost completely surrounded by water. This region also includes the South Islands sub-appellation in Lake Erie. Numerous short, shallow streams ~~found~~ throughout the Lake Erie North Shore ~~this~~ appellation flow freely in the spring but often dry down to a trickle in the warm summer. The appellation is made up of long, gentle slopes that face in all directions, with

Commented [NH7]: Reduced sentence complexity.

elevations ranging from 172 m (564 ft) to 196 m (643 ft) above sea level. With no major topographic barrier to the prevailing southwesterly winds, this appellation enjoys the full effect of the lake breeze that moderates the entire area during the long growing season.

Soil

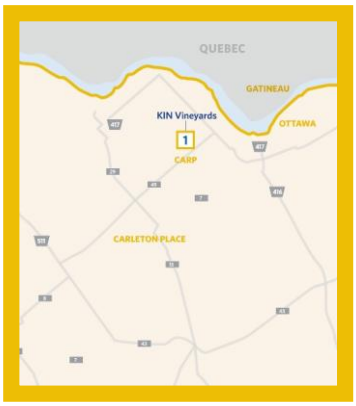
The soil composition was greatly affected by the glacial lakes, which deposited large amounts of unsorted stony materials in the area. When the glacial lakes elsewhere retreated, this area remained covered in deep waters for a longer period, allowing waves to smooth out the ridges and deposit considerable amounts of sediment. The light-textured and~~,~~ well-drained soils around the lakeshore ~~contain~~ are mostly sandy loam and gravel deposits ~~punctuated by~~with small, irregular stony ridges~~, which overlie~~ over shale limestone bedrock. The South Islands have similar soil makeup as the mainland, and ~~the majority of the~~ most vineyards are planted on the southwestern corner and centre of Pelee Island (the largest of the islands), where the soils are the deepest~~ and allow for root systems to properly set~~.

Download the map for a look at all the wineries in Lake Erie North Shore.

Page 3: Emerging Regions (Wines of Ontario, 2025e)

Expand Your Tastes, Explore Your Options

Be the first among friends to venture into those up-and-coming regions ~~that are~~ staking new claims in Ontario's Wine Country. Even better, assemble a group and invite them along. Whatever direction tempts you, enjoy a diversity of tastes, topographies and experiences.

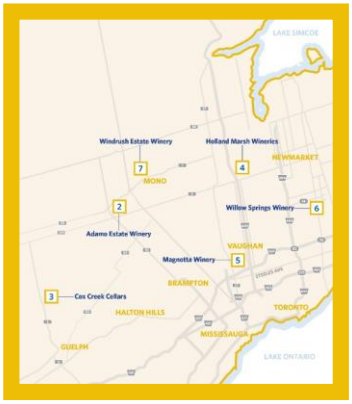


Ottawa & Area

Venture up towards the ~~N~~nation's capital for the newest ~~E~~emerging ~~R~~region. The grey limestone of the Ottawa formation provides the foundation for top-quality, cool-climate wines that are turning heads north. *Santé*!

Formatted: Font: Italic

Download the map for a look at all the wineries in Ottawa.



Close to Toronto

A short jaunt for Torontonians and a delicious destination for visitors from afar, the region north of the city offers a selection of wineries certain to impress. For those looking to stock up on the way to cottage country, these wineries offer convenient options.

Download the map for a look at all the wineries close to Toronto.

Norfolk County

Nearby Niagara and the North Shore of Lake Erie may dominate the conversation, but it's the whispers about Norfolk that should perk up your ears. Set midway between the bustle of these neighbouring wine regions, this area continues to build a budding wine scene. Cruise along the broad expanses of fertile farmland and save some time to wander in the popular beach town of Port Dover. Be sure to toast your flair for fresh new finds.

Download the map for a look at all the wineries in Norfolk.

Elgin County

Elgin County is ~~located~~ in Southwestern Ontario just a short drive from London~~, Ontario~~. This region, known for its country charm, trendy stores and stunning beaches, is perfect for a scenic rural drive or bike ride. This budding new wine region, which ~~also~~ boasts a diverse assortment of cuisine, is ~~definitely~~ worth a stop.

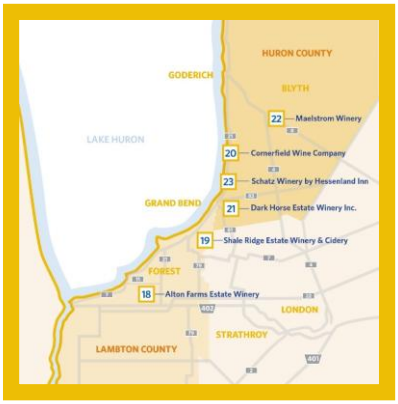
Commented [NH8]: Redundant

Download the map for a look at all the wineries in Elgin County.

Georgian Bay

Prepare for spectacular views and sensational tastes nestled here among the lush, rolling hills that overlook Georgian Bay. As this region continues to welcome a steady flow of urbanities looking for a permanent retreat, take the opportunity now to experience what is sure to become a flourishing wine scene. ~~Stay at your leisure or venture a little further north to~~ ~~e~~Enjoy a refreshing encounter with the bay, either on the southern beaches, up the Bruce Peninsula or along the rugged beauty of the eastern shoreline.

Download the map for a look at all the wineries in Georgian Bay.



Huron County & Lambton County

Declarations of "Go ~~W~~west!" have never been more fitting for wine enthusiasts. The promise of greater things gradually emerges along the shoreline of Lake Huron as ~~a number of~~several wineries have established a beachhead in the region. While more activity on the vineyard front is sure to surface, keep in mind that stunning beaches, cultural activities, culinary adventures, and more also beckon. Between vineyard visits and nosing around neighbouring villages, go squeeze some sand between your toes, savour lingering sunsets, and toast the good fortune of fresh adventure.

Download the map for a look at all the wineries in Huron Shores.

Commented [NH9]: Unclear what this phrase means

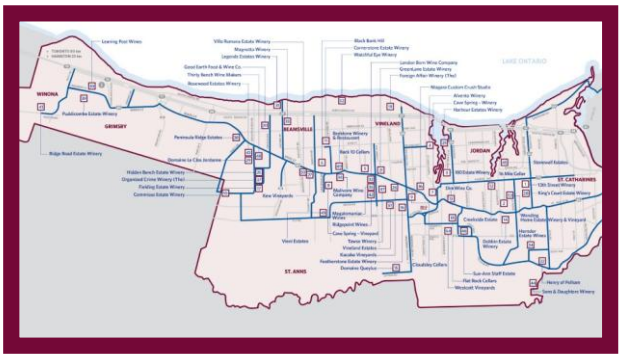
Commented [NH10]: Editing Canadian English 5.6.1: use lowercase for direction.

Page 4: Niagara Benchlands & Area (Wines of Ontario, 2025d)

~~Worldly~~ Global Flavours with a Local Focus

Commented [NH11]: AU: Ambiguous. Worldly implies pursuit of wealth and pleasure. Suggest “global” i.e. world-wide; or “refined” i.e. sophisticated. (Barber, 2001)

The Niagara ~~Escarpment~~ Benchlands are ~~and Area is~~ tucked between Lake Ontario and the Niagara Escarpment, just a short drive south of the ~~GTA~~Greater Toronto Area. ~~It includes~~As part of the regional appellation of Niagara Escarpment ~~which~~ it contains the sub-appellations of Beamsville Bench, Twenty Mile Bench, and Short Hills Bench. ~~and the~~The surrounding area includes the sub-appellations of Lincoln Lakeshore, Vinemount Ridge, and Creek Shores.



Climate

Sheltered from the stronger prevailing southwesterly winds by the Niagara Escarpment, and enjoying lake breezes reflected by the escarpment ridge, the benchland ~~macro~~climate is well moderated throughout the year. With the higher elevation, temperatures warm gradually in the spring, encouraging later bud-burst and avoiding risks of frost. In the fall, the escarpment slopes trap warm lake air and ~~allow for an~~ extend~~ed~~ the season for grape maturation.

Topography

The benchlands begin below the ridge of the Niagara Escarpment, a ~~prominent~~ striking feature cutting across the Niagara Peninsula. Below the forested ridge~~, a myriad of~~ are the appellation's many north-facing slopes ~~characterize this appellation~~. The topography ranges from a distinct bench in the west Beamsville Bench, backed by steep cliff faces, through a double bench in the Twenty Mile Bench, to undulating hills in the east Short Hills Bench. Another important ~~topographic~~ feature is the many streams and their tributaries ~~whose headwaters rise~~that flow from the escarpment. These streams ~~have~~ cut through the land~~, creating multiple slopes,~~ and are important both as a groundwater source and to provide water drainage during the spring melt.

Commented [NH12]: Archaic language, revised for tone.

Commented [NH13]: Confusing language; water doesn't rise.

Soil

From highly variable soils consisting of ~~water-stratified~~ layered clay and silt, to rich, ~~calcareous~~ chalky clay loam, ~~most of~~ this area's soils are deep, ~~and moderately drained~~ with good water-holding capacities. Combined with groundwater flowing from the base of the escarpment during the dry summers, these soils provide a steady supply of water ~~moisture~~ to vines throughout the growing season, while the slopes provide excellent natural drainage. The fossil-enriched ~~sedimentary dolomites~~rock that underlies this appellation ~~contribute to the~~ gives many bench wines a distinct minerality ~~found in many bench wines~~.

Commented [NH14]: Use plain language

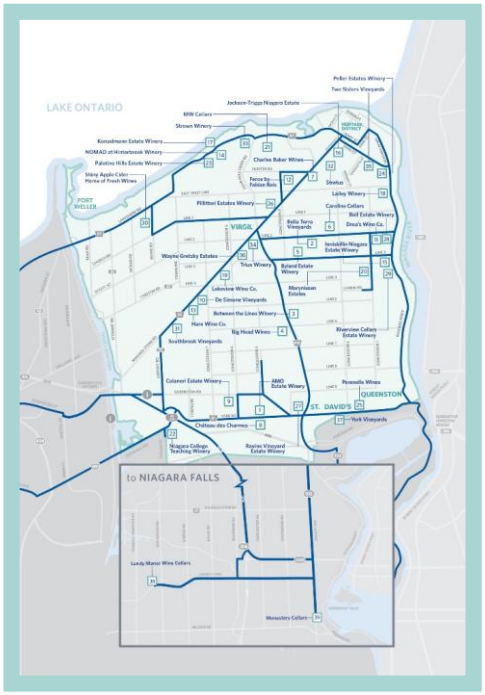
Download the map for a look at all the wineries in Niagara Escarpment & Area.

Page 5: Niagara-on-the-Lake & Area (Wines of Ontario, 2025b)

Where Our Roots Run Deep

The town of Niagara-on-the-Lake~~, —~~just an hour-and-a-half from the ~~GTA~~ Greater Toronto Area and ~~10~~ ten minutes from the Canada-US border~~, —~~includes four sub-appellations: ~~(~~Four Mile Creek, Niagara River, Niagara Lakeshore, and St. David's

Bench). Just a short drive away is the magical city of Niagara Falls, located in the Niagara Peninsula appellation.



Climate

The geographical attributes of Niagara-on-the-Lake have a meaningful impact on its climate. The region's Pproximity to the deep waters of Lake Ontario and the fast-flowing Niagara River moderates temperatures throughout the *viticultural* vinicultural region, reducing the risk of late spring and early fall frosts. Vineyards farther from the lake receive somewhat less of the lake's moderating effects, and thus experience a higher daily temperature range, with warm days and cool nights. Closer to the sheltering effects of the Niagara Escarpment, spring warming occurs earlier, with sun exposure on east- and south-facing slopes promoting bud-burst and bloom.

Commented [NH15]: Viticulture: grape cultivation. Viniculture: cultivation of grapes for wine. (Barber, 2001)

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Topography

Most of this region is lakeshore plains land, ~~characterized by~~ with long, gentle slopes that ~~become slightly more prominent~~ grow steeper in proximity to the north-facing Lake Iroquois Bluff. The gentle topography allows the entire region to enjoy generous sunlight exposure from early morning to late evening, ~~which provides~~ ~~heat accumulation~~ warming vineyards during the day ~~and throughout the season~~, promoting an early start to the growing season. Clear, calm conditions ~~often result in~~ provide high daily temperature ranges and excellent growing conditions for grapes.

Soil

~~Ranging from~~With soils ranging from sandy loam to ~~soils to soils primarily consisting of~~ red shale with ~~a~~ high silt and clay content, the ground's water-holding capacities vary ~~greatly~~ within this region. Because of the gradual ~~sloping~~ slope of the landscape toward the lake, ~~these soils tend to be~~the soil is moderately to well-drained with slow surface runoff.

Download the map for a look at all the wineries in Niagara-on-the-Lake & Area.

Commented [NH16]: Use plain language

Commented [NH17]: Use active voice

Summary Letter

Dear Mr. Snow,

I have completed my copyediting and proofreading of the following webpages for the Wines of Ontario website:

1. Prince Edward County
2. Lake Erie North Shore
3. Emerging Regions
4. Niagara Benchlands & Area
5. Niagara-on-the-Lake & Area

Most of the edits were line-level revisions from passive to active voice, which has a stronger impact on the reader. I also changed several instances of scientific language to more common terms. In general, I would suggest your writers use more approachable language—especially for the topography and soil sections—which had a lot of scientific terms that may confuse your readers (“stratified” and “calcareous” come to mind). I did not change terms that would be helpful for your wine-enthusiast audience but corrected or defined them as needed.

In my proofreading I corrected errors of word usage, stylistic issues (capitalization, Canadian English), and formatting inconsistencies.

I want to thank you again for the opportunity to review your website. I hope you are satisfied with the work done; I think that the articles on your site are a fantastic resource for individuals looking to expand their horizons and discover unique Ontario wines.

Please let me know if you have any questions or require clarification for any edits made.

Sincerely,

Nathan Hunt

Evaluation

Editing the Wines of Ontario website and following a project management process for a hypothetical client was an interesting experience. I enjoyed roleplaying the scenario as a freelance editor. Creating the contract and researching current rates for editing services was also a useful experience. My copyediting passes took longer than I expected, as I had to do some extra research, which made my editing less efficient and effectively lowered my hourly rates. In the future, I would make sure I have my style guide (Editing Canadian English, 3rd Edition), Canadian Oxford Dictionary, and any other sources at hand for quick reference. I expect that my pace of editing will also improve as I gain experience and can recognize copyediting errors more quickly.

Overall, this assignment went quite well. I felt well-equipped to tackle the project management cycle thanks to the resources in Technical Editing (Rude, 2011) and the course modules, as well as Technical Editing: An Introduction to Editing in the Workplace (Cunningham, 2020).
